Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touch points, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Discovery & AI Assessment	Stage 2 Strategy Execution & Automated Negotiation	Stage 3 Financial Recovery & Off boarding
Actions <i>What does the customer do?</i>	•Searches for manageable debt relief solutions online after feeling overwhelmed by monthly bills. •Creates an account and securely links their financial accounts (bank accounts, credit cards, loans). •Inputs their monthly income, expenses, and current financial constraints into the AI onboard wizard.	•Reviews the AI-generated financial recovery road map and chooses an optimized debt-settlement or repayment strategy. •Approves the automated negotiation mandates allowing the AI agent to contact creditors on their behalf. •Sets up a consolidated, automated single monthly payment	•Tracks their debt decreasing month-by-month via the app dashboard and views their improving credit score. •Completes their final optimized payment milestone, achieving official "Debt-Free" status. •Transitions into using the platform's AI micro-investment and automated savings tools to prevent future
Touchpoint <i>What part of the service do they interact with?</i>	•Platform Landing Page / Marketing Content. •Secure Plaid/Open Banking integration interface. •AI-guided onboarding chatbot or questionnaire.	•Interactive Financial Dashboard & AI Optimization Recommendation Engine. •Approvals & Consent Manager portal. •Automated updates feed (SMS/Email notifications) showing negotiation progress with creditors.	•Milestone Achievement screen (Celebration UI). •Credit Score Monitoring & Credit Bui •AI Financial Advisor / Wealth Building dashboard.
Customer Thought <i>What is the customer thinking?</i>	•Can I really trust this AI platform with my sensitive financial and bank account data? •Is there actually a realistic way out of this mountain of debt without ruining my credit forever? •I hope this onboarding process doesn't take hours or judge me for my spending habits.	•Wow, seeing all my options mapped out clearly makes this feel a lot more manageable •Will my creditors actually accept the automated settlement offers proposed by an AI •What happens if a creditor refuses to cooperate with the platform	•I can't believe I am finally debt-free! This platform genuinely saved my financial life. •How do I ensure I never end up in this kind of critical debt situation ever again •I want to start saving and investing money now, but I need guidance on how to do it safely.

Customer Feeling: <i>What is the customer feeling?</i>	• Anxious, stressed, slightly skeptical, but hopeful for a solution.	• Relieved to hand over the stress of negotiation, slightly nervous about creditor responses, but empowered.	• Elated, proud, deeply relieved, confident, and highly loyal to the platform.
Process Ownership: <i>Who is in the lead on this?</i>	• Product UX/UI Team & Data Security Engineering Team.	• AI Engine/Machine Learning Team & Creditor Relations / Legal Operations Team.	• Customer Success Team & Financial Product Expansion Team (WealthTech Developers).
Opportunities: <i>How can we</i>	• Display prominent bank-grade security badges and clear privacy explainers during account linking to build instant trust. • Use an empathetic, encouraging tone in the chatbot script to reduce user anxiety. • Provide a 30-second anonymous Estimated Savings slider on the landing page so users see immediate value before sharing any private data.	• Implement real-time push notifications or a live tracker (e.g., "AI is currently negotiating with Chase Bank...") to keep users informed. • Incorporate a "Human-in-the-loop" fallback system where a legal expert steps in if a creditor rejects the AI's automated proposals. • Use highly visible, bank-grade encryption badges (like Plaid icons) and transparent micro-copy explaining <i>exactly</i> why the AI needs account access	• Create a shareable, gamified "Financial Milestone Certificate" or referral program that celebrates their graduation to a debt-free life. • Seamlessly upsell a "Credit Builder Credit Card" or localized low-risk investment vehicles to transition users from "recovering" customers to "wealth-building" customers. • Create a real-time progress pipeline (similar to a pizza delivery tracker) showing active negotiations with creditors (e.g., "AI submitted optimized counter-offer to Chase").
