

Functional & Performance Testing Template

Model Performance Test

Date	04 JULY 2026
Team ID	SWTID-2026-2662
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	User Registration & Login Validation	Enter valid and invalid user credentials during registration and login	Valid users can register/login successfully, invalid inputs display appropriate error messages	Registration and login worked correctly with validation messages for invalid inputs	Pass
FT-02	Financial Profile & Loan Input Validation	Enter valid and invalid values for income, expenses, loan amount, EMI, interest rate, and overdue months	System accepts valid inputs and rejects invalid or incomplete values	Input validation worked correctly and invalid entries were prevented	Pass
FT-03	AI Debt Settlement & Negotiation Generation	Enter financial details and generate AI settlement strategy and negotiation email	AI generates personalized settlement strategy and negotiation letter based on user data	AI successfully generated settlement strategy and negotiation email using Gemini API	Pass
FT-04	Backend API Connection	Connect Streamlit	Backend APIs respond	All API endpoints	Pass

		frontend with FastAPI backend and access all API endpoints	successfully and data is retrieved correctly	responded correctly and data synchronized successfully	
PT-01	Dashboard Response Time	Login and load Dashboard, Financial Health, and Settlement Predictor pages	Dashboard loads within acceptable response time (less than 3 seconds under normal conditions)	Dashboard loaded quickly without noticeable delay	Pass
PT-02	API Performance Test	Perform multiple API requests such as login, loan retrieval, and AI strategy generation	APIs remain responsive without failures during normal usage	APIs remained stable and processed requests successfully	Pass
PT-03	Loan Data Processing Test	Add, update, retrieve, and delete multiple loan records	Loan management operations execute correctly without crashes or data inconsistency	All loan operations completed successfully and data remained consistent	Pass
