

Sprint Planning & Velocity Calculation

Date	3 July 2026
Team ID	SWTID-2026-2662
Project Name	AI Powered Debt Relief & Financial Recovery Platform

Agile Planning Concepts

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task. It is part of an Epic.

A Story Point is a number that represents how much effort a story takes to complete (usually expressed using the Fibonacci series).

- 1 — Very Easy task
- 2 — Normal task
- 3 — Moderate task
- 5 — Difficult task
- 6–8 — Very Difficult / complex task (used here for AI and settlement-prediction modules)

Story Point Scale Used for This Project: 1, 2, 3, 4, 5, 6, 7, 8

Sprint-Wise Story Point Breakdown

Sprint 1

Epic 1 – FinRelief AI Application Development & System Setup

Python Backend Environment Setup (USN-1) — 3 points

Backend Dependency Installation Using requirements.txt (USN-2) — 2 points

Frontend Setup (React.js + Vite) (USN-3) — 3 points

Project Structure & Full-Stack Directory Organization (USN-4) — 2 points

Total Story Points in Sprint 1 = 3 + 2 + 3 + 2 = 10

Sprint 2

Epic 2 – AI Integration & Financial Processing Setup

FastAPI Backend & API Endpoints (USN-5) — 5 points

Financial Engine Module (USN-6) — 5 points

Settlement Prediction System (USN-7) — 8 points

AI Negotiation Strategy Engine (USN-8) — 8 points

Fallback Logic Implementation (USN-9) — 3 points

Total Story Points in Sprint 2 = 5 + 5 + 8 + 8 + 3 = 29

Sprint 3

Epic 3 – Database Management & Financial Data Storage Setup

API Development Functionality (USN-10) — 5 points

Loan & Settlement Processing Functionality (USN-11) — 6 points

Data Handling (USN-12) — 5 points

Total Story Points in Sprint 3 = 5 + 6 + 5 = 16

Sprint 4

Epic 4 – Frontend Integration & User Interface Development

User Interface Development (USN-13) — 3 points

Frontend Communication With FastAPI (USN-14) — 3 points

Financial Health Metrics & Settlement Data Visualization (USN-15) — 8 points

UI Enhancements (USN-16) — 7 points

Total Story Points in Sprint 4 = 3 + 3 + 8 + 7 = 21

Sprint 5

Epic 5 – Testing, Debugging & Performance Optimization

System Testing (USN-17) — 5 points

Backend Error Handling & AI Fallback Management (USN-18) — 5 points

Performance Optimization & Secure Session Management (USN-19) — 5 points

Total Story Points in Sprint 5 = 5 + 5 + 5 = 15

Sprint 6

Epic 6 – Version Control, Project Finalization & Deployment Readiness

GitHub Repository Setup & Version Control Management (USN-20) — 4 points

Project Cleanup & Modular Folder Structure Organization (USN-21) — 3 points

Deployment Configuration & Production Readiness Setup (USN-22) — 6 points

Total Story Points in Sprint 6 = 4 + 3 + 6 = 13

Total Story Points Summary

Sprint	Epic Focus	Story Points
Sprint 1	Epic 1 – FinRelief AI Application Development & System Setup	10
Sprint 2	Epic 2 – AI Integration & Financial Processing Setup	29

Sprint	Epic Focus	Story Points
Sprint 3	Epic 3 – Database Management & Financial Data Storage Setup	16
Sprint 4	Epic 4 – Frontend Integration & User Interface Development	21
Sprint 5	Epic 5 – Testing, Debugging & Performance Optimization	15
Sprint 6	Epic 6 – Version Control, Project Finalization & Deployment Readiness	13
Total	—	104

Velocity Calculation

Velocity = Total Story Points Completed ÷ Number of Sprints

- Total Story Points = 10 + 29 + 16 + 21 + 15 + 13 = 104
- Number of Sprints = 6

Velocity = 104 / 6 = 17.33 (Story Points per Sprint)

Your team's velocity is approximately 17.3 Story Points per Sprint.
