

Project Demo Planning

Date	3 JULY 2026
Team ID	SWTID-2026-2662
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction & Architecture	Introduce the project objectives, problem statement, technology stack, and explain the enterprise architecture and workflow.	3	Hema Sai Sree
2	User Authentication & Dashboard	Demonstrate user registration, login, JWT authentication, dashboard overview, and loan management features.	4	Shalini
3	Financial Health Analysis & Settlement Prediction	Demonstrate financial health metrics, debt stress analysis, EMI ratio, debt-to-income ratio, and AI-powered settlement prediction.	5	Dharani
4	AI Negotiation Letter Generator	Demonstrate AI-generated lender negotiation strategies and settlement request letter generation using Google Gemini AI.	4	Nithya Sree
5	Database, API Integration & Testing	Explain FastAPI APIs, SQLite database, SQLAlchemy ORM, data storage, AI history, and overall system integration.	3	Hema Sai Sree
6	Project Conclusion & Future Enhancements	Present project outcomes, achievements, future scope, deployment readiness, GitHub overview, and answer mentor questions.	3	Dharani & Nithya Sree

Demo Flow Summary:

Step	Activity	Notes
------	----------	-------

1	Introduction & Problem Statement	Introduce the project, explain the challenges borrowers face in debt management, and describe the objective of developing an AI-powered debt relief and financial recovery platform. Briefly present the technology stack (React.js + Vite, FastAPI, Python, SQLite, SQLAlchemy, Google Gemini AI).
2	Solution Overview	Explain the enterprise architecture, workflow, Agile sprint development process, and core modules including User Authentication, Financial Health Engine, Settlement Prediction, AI Negotiation Strategy, Loan Management, and Database Integration.
3	Live Feature Demonstration	Demonstrate user registration and login, dashboard, loan management, financial health analysis, settlement prediction, AI-generated negotiation letter, AI history, and database operations with FastAPI and SQLite.
4	Q&A Session	Summarize project outcomes, discuss implementation challenges and solutions, explain future enhancements, and answer mentor questions regarding architecture, AI integration, APIs, database design, and deployment.
